# INFORMATION AND SOFTWARE TECHNOLOGY

## Index to Volume 36 (1994)

Number 1 (January) pp 1–64
Number 2 (February) pp 65–128
Number 3 (March) pp 129–192
Number 4 (April) pp 193–248
Number 5 (May) pp 249–312
Number 6 (June) pp 313–376
Number 7 (July) pp 377–472
Number 8 (August) pp 473–528
Number 9 (September) pp 529–584
Number 10 (October) pp 585–640
Number 11 (November) pp 641–696
Number 12 (December) pp 697–752

## Article Index

### Number 1

CSPL: a process-centred environment
Jen-Yen Chen and Chia-Ming Tu 3
Problem solving strategies for open-systems based organization decision support systems
Rajeev Kaula 13
The use of Prolog in the modelling and evaluation of structure charts
T H Tse, T Y Chen and C S Kwok 23
OO oversold
A Bryant and A Evans 35
Viewpoint specification and Z
M Ainsworth, A H Cruikshank, P J L Wallis and L J Groves 43

### Number 2

Improving object-oriented analysis
Gabriel Eckert and Paul Golder 67
Semantic correspondence in integrating CASE tool repository schemas
C N G Dampney and R M Colomb 87
Using machine apprentices for transient knowledge work
Gregg Elofson 97
AIDA: a dynamic analyser for Ada programs
F E Eassa, L J Osterweil and M Z Abdel-mageed 107
Making C++ a persistent OOPL
Rui Chen, Xi-yao Cai and Ping Chen 119

### Number 3

Binary ranking for the signature file method
D Dervos, P Linardis and Y Manolopoulos 131
Data conversion rules from network to relational databases
Joseph Fong and Chris Bloor 141
Hierarchical Censored Production Rules (HCPRs) system employing the Dempster–Shafer uncertainty calculus
K K Bharadwaj, Neerja and G C Goel 155
Information cost as a determinant of system architecture
Levent Orman 165
Software measurement methods: recipes for success?
John Roche and Mike Jackson 173

### Number 4

Hypermedia link services and their application to multimedia information management
Wendy Hall and Hugh Davis 197
System support for multimedia applications: an assessment of the state of the art
Gordon S Blair, Geoff Coulson and Nigel Davies 203
Time-varying Sensitive Regions in dynamic multimedia objects: a pragmatic approach to content-based retrieval from video
Victoria Burrill, Thomas Kirste and Jochen Weiss 213
Systematic design for task related multimedia interfaces
Alistair Sutcliffe and Peter Faraday 225
Retrieval and delivery of information in multimedia database systems
F Golshani and N Dimitrova 235
On the promises of multimedia authoring
Stephen W Smoliar 243

### Number 5

Predicting the development effort of multimedia courseware
I M Marshall, W B Samson, P I Dugard and W A Scott 251
The information content and user driven aspects of the ACT-IT multimedia authoring system
B Inwood, I Connell, R Scane, J Collyer, B Christie, V Ashcroft, I Brown and J Knight 259
A phased approach to the evaluation and selection of CASE tools
Louis A Le Blanc and Willard M Korn 267
Evidence on economies of scale in software development
Rajiv D Banker, Hsihui Chang and Chris F Kemerer 275
A meta-model of information systems to support reverse engineering
M J Freeman and P J Layzell 283
PM-Net: a software project management representation model
Kuen-Ching Lee, Iuan-Yuan Lu and Hsin-Hui Lin 295

### Number 6

Object-oriented modelling of hyperstructure: overcoming the static link deficiency
H Maurer, N Scherbakov, K Andrews and P Srinivasan 315
A semantic database approach to knowledge-based hypermedia systems
Paul Beynon-Davies, Douglas Tudhope, Carl Taylor and Christopher Jones 323
(In)completeness in specifications
V S Alagar and D Kourkopoulos 331
Modelling and simulation in an object-oriented environment
Cheng-Jye Luh 343
Developing transputer-based systems using HOOD and Parallel C
Paul Moore and Peter G O'Donoghue 353
A matrix editor for a metaCASE environment
Steven Kelly 361

### Number 7

Software engineering for parallel systems
Innes Jelly and Ian Gorton 381
Parallel software development using an object-oriented modelling technique
Chris Knowles and Pete Collingwood 397
Graph-based software construction for parallel message-passing programs
Guido Wirtz 405

0950-5849/94/012756–05 © 1994 Butterworth-Heinemann Ltd

### Number 7

Software engineering for parallel systems
Innes Jelly and Ian Gorton 381
Parallel software development using an object-oriented modelling technique
Chris Knowles and Pete Collingwood 397
Graph-based software construction for parallel message-passing programs
Guido Wirtz 405

0950-5849/94/012756–05 © 1994 Butterworth-Heinemann Ltd

Design and code derivation in the PCSC methodology
Gordon A Manson, Shahrin Sahib and Chandran Elamvazuthi 413
A portable parallel programming environment based around PCTE
Stephen A Hellberg and Ed Zaluska 419
TOPIC-SE: a tool-based open platform for integration of control in software environments
Karim Foughali and Bertil Folliot 427
A Petri net based methodology to integrate qualitative and quantitative analysis
Monika Heiner, Giorgo Ventre and Dietmar Wikarski 435
Use of GSPNs for concurrent software validation in EPOCA
Susanna Donatelli, Giuliana Franceschinis, Marina Ribaudo and Stefano Russo 443
Engineering safety-related parallel systems
C I Birkinshaw, P R Croll, D G Marriott and P A Nixon 449
Modelling parallel program behaviour in ALPES
João Paulo Kitajima and Brigitte Plateau 457
Neutral debugging using grafts
Serge Chaumette 465

**Number 8**

The economics of reuse: new approaches to modelling and assessing cost
Shari Lawrence Pfleeger and Terry B Bollinger 475
On decision tree verification and consolidation
David Chenho Kung 485
Enhancing software reusability through effective use of the essential modelling approach
Soheil Khajenoori, Darrell G Linton and Carl A Morris 495
Object-oriented methodologies of Coad and Yourdon and Booch: comparison of graphical notations
F Losavio, A Matteo and F Schlienger 503
Automated dismemberment of JSD process specifications
Andrew Bass and Bryan Ratcliff 515

**Number 9**

Non-use phenomenon of CASE tools: Malaysian experience
M H Selamat, C Y Choong, A T Othman and M M Rahim 531
Dialogue specification and control: a review of models and techniques
David T Clarke and Geoff P Crum 539
View definition in an object-orientated database
S R Monk 549
Design of Sentinel: an object-oriented DBMS with event-based rules
S Chakravarthy, E Anwar, L Maugis and D Mishra 555
An annotated bibliography for object-oriented analysis and design
S Webster 569

**Number 10**

Modelling the CASE process: empirical issues and future directions
Stephen King and Robert Galliers 587
Visualizing advanced data modelling constructs
Ghassan al-Qaimari, Norman W Paton and Alistair C Kilgour 597
Compiler test suite: evaluation and use in an automated test environment
A Boujarwah and K Saleh 607
A reachability tree for statecharts and analysis of some properties
P C Masiero, J C Maldonado and I G Boaventura 615
A selective enumeration based heuristic for rule allocation
Mukesh K Mohania and N L Sarda 625

**Number 11**

Problems in CASE introduction: experiences from user organizations
Ivan Aaen 643
Enactable process specification in support of process-centred environments
Alan M Christie 655
The formal specification of concurrent systems: a small CCS case study
I M Bradley 667
Formal methods and design extraction: a pilot study
Padmanabhan Krishnan 675
An object-oriented modelling approach to system software design
P J Lee, D J Chen and C G Chung 683

**Number 12**

Translating VDM specifications into ABC programs
Aaron Kans and Clive Hayton 699
Optimistic priority-based concurrency control protocol for firm real-time database systems
Jinhwan Kim and Heonshik Shin 707
A tutorial on secure database systems
George Pangalos 717
Genetic algorithms for optimal logical database design
P van Bommel, ThP van der Weide and C B Lucasius 725
The design of the user interface for a large physics experiment
G Manduchi, G Fregonese, C Taliercio and T W Fredian and J A Stillerman 733
Design and development of EASEL: a portable UIMS tool
Francis Neelamkavil and Joseph Drumgoole 743

Logic programming, Structure charts 23

**Query languages**
Multimedia systems, Information delivery 235

**Reachability tree**
Statecharts, Reactive systems 615
**Reactive systems**
Statecharts, Reachability tree 615
**Real-time database systems**
Concurrency control, Priority ordering techniques 707
**Relational**
Data conversion, Network 141
**Requirements analysis tools**
Decision trees, Consistency 485
**Returns to scale**
Scale economies, Productivity measurement 275
**Reuse**
Cost models, Cost estimation 474
**Reverse engineering**
Design recovery, Software maintenance 283
**Rule-based process enactment**
Graphical process definition, Process-centred environments 655
**Rulebase**
Deductive databases, Distributed databases 625

**Safety-related computing**
Parallel processing, Software engineering 449
**Scale economies**
Returns to scale, Productivity measurement 275
**Schema browser**
Database views, Object-oriented database 549
**Secure database design**
Database security, Secure database development methodologies 717
**Secure database development methodologies**
Database security, Secure database design 717
**Semantic correspondence**
Integration, CASE 87
**Semantic databases**
Hypermedia, Binary relational model 323
**Soft systems methodology**
CASE, Software process models 587
**Software engineering**
Parallel software design, Concurrency 397
Parallel processing, Safety-related computing 449
**Software evaluation and selection**
CASE, Computer aided systems engineering 267
**Software maintenance**
Reverse engineering, Design recovery 283
**Software metrics**
Measurement process, Measurement methods 173
**Software process**
Software process language, Process enactment 3
**Software process language**
Software process, Process enactment 3
**Software process models**
CASE, Soft systems methodology 587
**Software reusability**
Essential modelling 495
**Software reuse**
Modelling, Entity refinement 683
**Software testing**
Compiler, Instrumentation 607
**Software tools**
Jackson System Development (JSD), Transformational implementation 515
**Software validation**
Parallel software engineering, Process-oriented imperative languages 435

**Specification**
Amalgamation, Viewpoints 43
**Specifying parallelism**
Parallel programming environments, Parallel programming languages 405
**State transition diagrams (STD)**
Dialogue specification, Grammars 539
**Statecharts**
Reactive systems, Reachability tree 615
**Structure charts**
Logic programming, Prolog 23
**Synthetic programs**
Parallelism, Distributed memory parallel computer 457
**System technology**
Knowledge work, Machine apprentices 97
**System development**
Object-orientation, Methods integration 35

**Tool related problems**
CASE implementation, User perceptions 643
**Transformational implementation**
Jackson System Development (JSD), Software tools, 515

**User perceptions**
CASE implementation, Tool related problems 643

**Validation**
Model-based formal methods, Vienna Development Method (VDM) 699
**Vienna Development Method (VDM)**
Model-based formal methods, Validation 699
**Viewpoints**
Amalgamation, Specification 43
**Visualization**
Data modelling, Interface evaluation 597

**Window-based interfaces**
Data acquisition and control systems, Interface technology 733

**Book reviews** 53, 373, 637, 752

**Conference Reports** 190, 751

**Calendar** 61, 127, 191, 247, 309, 375, 471, 525, 583, 639, 695, 754
